TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Java, C++, Python, SQL
- **Backend & Frameworks:** Node.js, Express.js, Spring Boot, FastAPI, Flask
- **Databases:** MongoDB, MySQL, PostgreSQL, Oracle, Redis
- **Architecture & Tools:** Microservices, Docker, Nginx, Kafka, RabbitMQ, RESTful APIs, JUnit, WebSocket, Load Balancing, Reverse Proxy, Caching, JWT Authentication, System Design
- **DevOps & Collaboration:** Git, GitHub, CI/CD, Agile/Scrum, Jira, Postman, VS Code, Eclipse, Git Bash
- **Frontend:** React, Next.js, React Native, React Query, React Context API, Redux, Tailwind CSS, HTML, CSS, Firebase

EXPERIENCE

- **Cnear (YoursThatSenior Pvt. Ltd.)** Remote
Software Developer Engineer Intern Nov 2024 - Jun 2025
 - Built and deployed **Placement Management Microservices** (10K+ users) using **Node.js** and **Spring Boot**, improving workflow automation by 70%.
 - Designed and implemented **RESTful APIs** following strong **system design patterns**, ensuring high maintainability, scalability, and fault tolerance.
 - Developed **event-driven architecture** using **Kafka** and **RabbitMQ** for async task processing, boosting reliability and throughput under load.
 - Applied **Test-Driven Development (TDD)** with **unit testing and feature testing (JUnit, Jest, Postman)** and conducted **load testing** to validate performance.
 - Optimized **PostgreSQL**, and **MongoDB** databases using **query tuning**, **Redis caching**, **profiling**, **debugging**, and troubleshooting to reduce latency by 50%.
 - Containerized services with **Docker** and automated deployments via **CI/CD pipelines (GitHub Actions, AWS)**, configuring **API Gateway** and **Nginx** for secure, discoverable, and scalable deployment.
- **Hello Growing Pvt. Ltd.** Remote
Software Engineer (Contract) Jul 2025 - Sep 2025
 - Developed and deployed a modular Course Management Platform using MERN + Next.js with a microservices architecture for Admin, Student, and Public portals.
 - Built scalable RESTful APIs integrated with Razorpay, JWT authentication, Redis caching, and AWS S3 storage, improving performance and data accessibility by 40%.
 - Implemented CI/CD pipelines, Docker-based containerization, and Nginx reverse proxy for automated deployments, routing, and service reliability.
 - Performed load testing, query optimization, and asynchronous event-driven processing to ensure API scalability and near-zero downtime under high concurrency.
 - Collaborated in agile sprints, conducting peer reviews and maintaining production-grade code with TDD and performance monitoring.

PROJECTS

(ALL PROJECTS ON GITHUB)

- **Golang Load Balancer & Reverse Proxy Server:** Designed a high-performance load balancer in Go with Round Robin routing, YAML-based configuration, and concurrency via goroutines and channels. Integrated in-memory caching, reverse proxying, and graceful shutdown for fault tolerance and scalability.
- **AI-Powered Learning & Portfolio Suite:** Engineered an AI-driven platform using React, Node.js, and OpenAI APIs to auto-generate structured notes, AI-curated lectures, and ATS-optimized resumes. Integrated PDF generation, RESTful APIs, and cloud deployment for 90% workflow automation.
- **WanderBuddy: Trip Planning App:** Built a collaborative React Native travel app with 500+ users featuring real-time chat, itinerary sharing, and web scraping via Puppeteer for live hotel and transport data from 10+ websites. Applied JWT-based authentication and optimized API performance.
- **Restaurant POS Software:** Developed a restaurant management system with Node.js, Express.js, and MongoDB supporting multi-role authentication, real-time KDS, variant handling, and analytics dashboard. Improved kitchen processing speed by 35% through query optimization and caching.

EDUCATION

- **Sarala Birla University** Ranchi, Jharkhand
Bachelor of Technology in Computer Science Engineering; GPA: 8.33 Aug. 2021 - May 2025

ACHIEVEMENTS / LEADERSHIP

- Achieved 1780+ rating in LeetCode Contests and ranked in the top 10% globally.
- Enhanced coding skills by solving over 650+ LeetCode problems, solidifying knowledge of algorithms and data structures, and enabling the creation of more robust and maintainable software solutions.
- Led my academic minor, and major projects end-to-end, taking charge of planning, architecture, and implementation with teams of 3 members. Received the **Best Project Award** for innovative and impactful project execution.
